FLOW FILO

Designed by Jean Marie Massaud

Perfect blend of design and manual flair, Flow Filo is characterised by the precious craftsmanship of its workmanship, achieved by welding together the thin steel wires of which it is composed. Its unmistakable silhouette, suitable for outdoor environments, maintains all the refinement of the iconic Flow family.

Available in the chair and slim versions, it is completed by a single sled base and an optional polyurethane pad to increase the comfort of the seat and backrest.

OUTDOOR VERSION

Load-bearing frame in steel rods, of different diameters, with original sled base design, epoxy powder-coated in bronze matt and black nickel finishes, with a specific treatment for outdoor use.

Special pad for outdoor use, made by molding in soft integral polyurethane, in matt mud and anthracite grey colors. This particular soft integral polyurethane is called FreeForm, with a smooth soft touch surface, with a good mechanical and aging resistance. Available in the seat and/or backrest versions.

INDOOR VERSION

Load-bearing frame in steel rods, of different diameters, with original sled base design, available in glossy black chrome or nickel chrome finishes. Special pad, for indoor use only, made of leather with polyurethane padding, in ivory and black matt colours. Available in the seat or seat and backrest versions. Cover not removable. Fastens to the structure using special buckles on the back part.

Finishing

The number in the dot corresponds to the number of colour/material finish.

Here below, in the section FINISH OPTIONS, please note all the colours of the materials used for this product.
