The stage conceived to highlight the MDF Italia Novelties 2019 is a space balancing between material and immaterial, where drawn walls and real walls define a world of shapes, whose materiality is still quite ethereal and abstract.

Two types of space levels co-exist in this set-up. The first level lets you perceive the space in which objects are placed and evokes scenarios. The second one is more descriptive and museum-like, and lets the objects show off in their pure essence.

These are hints of domestic interiors and passing places, where objects show a hybrid identity, an intermediate stage still in the field of thoughts and drawn lines.
