## CHAIR OF BRAIDED ROPE

Lounge chair for indoor and outdoor

### Bilder

### Artikel

Bright colors and eye-catching design.

The manually braided rope that design the chair creates a seat of character, characterized by the contrasting cross-stitch that runs through the center.

Its airy surface emphasizes the true soul of the chair. The elegant steel wire base, available in white, bronze or black nickel, is in perfect harmony with the seat.

The armchair turns out to be very versatile and can be made either with or without armrests. Both inside and outside, the chair attracts attention, being a modern and elegant piece of furniture.
